Professional Summary

Skilled Machine Learning Engineer specializing in Generative AI (GenAI) and Large Language Models (LLMs). Hands-on experience in prompt engineering, Retrieval-Augmented Generation (RAG), and agent-based techniques. Proficient in Python, LangChain, SQL, and cloud platforms (AWS, Azure, GCP). Adept at driving technical roadmaps, developing scalable AI solutions, and collaborating effectively across teams to deliver impactful products.

Professional Experience

AI Engineer Intern, Tech Innovators Pvt. Ltd.

(April 2024 – July 2024)

- Fine-tuned Large Language Models (LLMs) for domain-specific tasks such as text generation and summarization.
- Built and deployed an AI pipeline using Azure, reducing deployment time by 25% and ensuring scalability.
- Designed and optimized data preprocessing workflows, improving model training efficiency by 20%.

Tools Used: Azure ML Services, LangChain, Python, SQL.

Projects

Multimodal Foundation Model Trainer

- Built a pipeline to fine-tune foundation models using embeddings, increasing model accuracy by 30%.
- Developed a scalable framework for efficient training of multimodal models, reducing training time by 40%.
- Enabled integration with cloud platforms (AWS and GCP) for distributed training.

Tools Used: TensorFlow, PyTorch, AWS, GCP.

AI-Powered Sentiment Analysis Tool

- Designed a real-time sentiment analysis model using transformer-based architectures, achieving 90% accuracy.
- Integrated the model into a cloud-based web application for real-time predictions and scalability.
- Conducted hyperparameter tuning, boosting model performance by 15%.

Tools Used: Transformers, AWS, Docker.

Education

Master of Computer Applications (MCA)

Shri Ram Group of College, Muzaffarnagar

(Completed: 2024)

Bachelor of Computer Applications (BCA)

SD College of Management Studies, Muzaffarnagar

(Completed: 2022)

Skills

- **Generative AI and NLP:** Expertise in prompt engineering, RAG, LLM fine-tuning, and transformers.
- **Programming Languages:** Python, LangChain, SQL, PyTorch, TensorFlow.
- **AI Deployment:** Proficient in cloud platforms (Azure, AWS, GCP) and Docker-based deployment.
- **Data Preprocessing:** Data cleaning, augmentation, and synthetic data generation.
- **Collaboration:** Excellent communication skills for cross-functional teamwork.

Certifications

- **AI Engineering and Deep Learning** (Google)
Focused on advanced AI techniques, deep learning architectures, and real-world AI applications.
- **Prompt Engineering** (Udemy)
Specialized in crafting effective prompts for LLMs to optimize outputs and improve model interaction.
- **Cloud AI Development** (Microsoft)
Learned to deploy, manage, and optimize AI models using Azure AI services.
